

# Canadian Housing Survey

## THE CANADIAN HOUSING SURVEY

The 2024 Canadian Housing Survey (CHS) collects valuable information about housing needs and experiences. Your information will be used to help understand and address issues such as access to affordable housing, and to improve housing conditions.

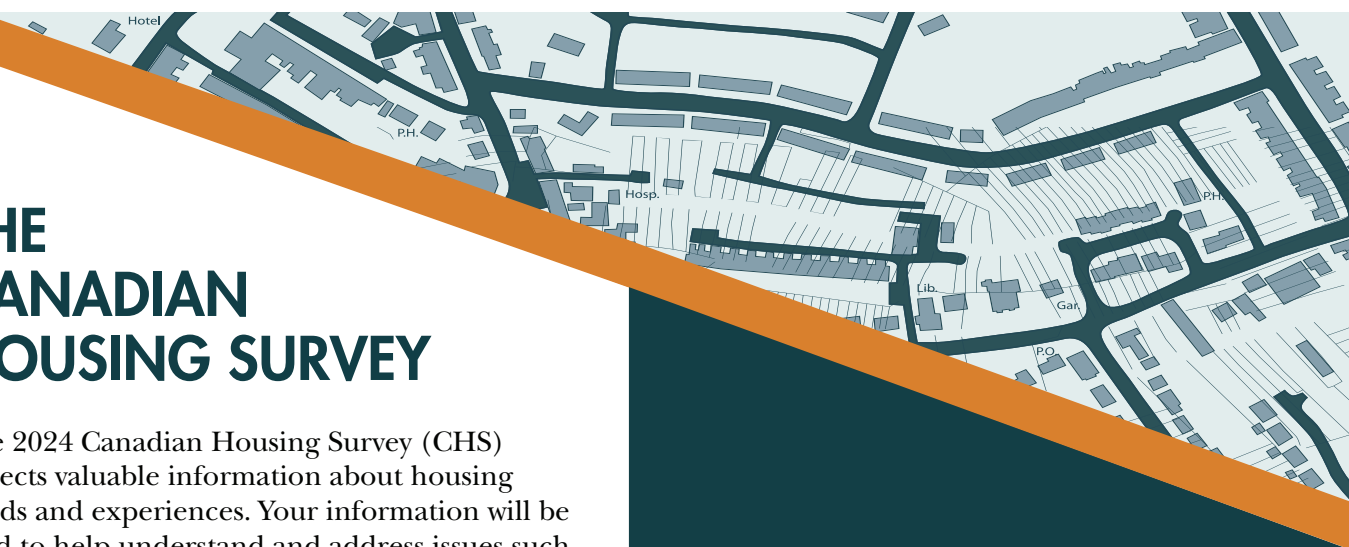

Statistics Canada conducts the CHS in partnership with the Canada Mortgage and Housing Corporation.

## HOUSING IS MORE THAN JUST A ROOF OVER OUR HEADS

Learning about the housing needs and experiences of Canadians is a vital first step in finding solutions to some of our important challenges. To do that, Statistics Canada needs your help!

Share your experience, and participate in the CHS. Help us learn more about how housing relates to the well-being of Canadians and how affordable housing can help communities be inclusive and sustainable.

Housing information is key to overcoming housing challenges

## SPECIFICALLY, THE SURVEY WILL HELP ANSWER QUESTIONS SUCH AS

- How do homes, neighbourhoods and communities meet the needs of those who live there?
- Are those most in need able to access affordable housing?
- What factors contributed towards locating and maintaining stable housing?
- What are Canadian households' short- and long-term housing goals?

Someone who is responsible for making housing decisions in your household should complete the 2024 CHS.

## YOU CAN MAKE A WORLD OF DIFFERENCE

Whether or not you are satisfied with your housing, your participation makes a difference.

By interviewing a cross-section of the population, Statistics Canada will deliver an up-to-date snapshot of the housing needs of Canadians and the state of Canada's affordable housing.

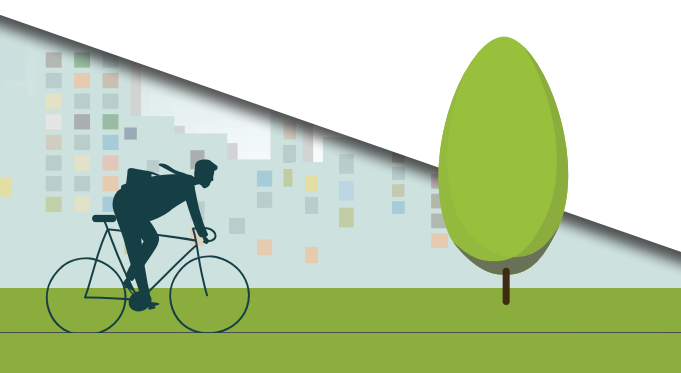

This information will guide decisions about social and housing programs designed to meet the needs of Canadians.

Your answers are important, because they represent other Canadians like you. Every person who does not answer the survey impacts the quality of the results. Your participation is essential to ensuring the data are the best they can be!

## PARTICIPATING IS EASY

Statistics Canada is conducting this survey in the ten provinces. We know Canadians are busy, and we very much appreciate you taking the time to assist us with the CHS.

Please refer to the letter you received from Statistics Canada. It contains the information you need to access and complete the survey.

## THE INFORMATION YOU PROVIDE IS CONFIDENTIAL

All information collected by Statistics Canada is strictly confidential and is protected by the *Statistics Act*. Statistics Canada cannot release any information that would identify you or any member of your household without your consent. Furthermore, this information cannot be released under any other law, not even the *Access to Information Act*.
