5. What percentage of question 4, B	076	6	Zero □									
Section B - Capacity Utilization (Manufacturing companies only)												
1. For 2007, this plant has been operating at what percentage of its capacity? (If the year is not complete when you fill in this questionnaire, report for the year to date) Capacity is defined as maximum production attainable under normal conditions. With regard to normal conditions, please follow the company's operating practices with respect to the use of productive facilities, overtime, workshifts, holidays, etc. When any of your facilities permit the substitution of one product for another, use a product mix at capacity which is most similar to the composition of your 2007 output.												
2. If this plant has been operating at less than capacity during 2007, what is the principal reason? (Please check the appropriate boxes) • insufficient orders • insufficient labour available • lack of materials or supplies • strike or work stoppage • plant shutdown • start-up of new operation • sufficient inventory • sufficient inventory • other reasons (please specify): • other reasons (please specify):												
3. If this plant has been operating at more than capacity during 2007, what is the principal reason? (Please check the appropriate boxes) • stronger demand for product • insufficient inventory • other reasons (please specify):												
4. Has the production capacity of this plant changed in 2007? (change in resources e.g. plants, equipment, workforce, etc.) • Increased 870 • Decreased 871 • No change 872 •
